THE MAKING OF A LEGEND

The year was 1944. Italy was facing a severe economic crisis with the world at war.
People wanted something that symbolised a better time ahead, something inspiring. A small group of engineers came together in an experimental test centre called Officina 8. Under the tutelage of Enrico Piaggio, they shared one clear idea: to create a two-wheeler that people could trust, afford and love. It was a humble workshop. It carried the familiar scent of motor oil, metal, and long hours. But more than anything, it was filled with the belief that mobility could give people freedom in difficult times.
Officina 8 is where Vespa found its soul. And today, that same spirit lives on in the Vespa Officina 8.
